

REWIND TIME IN YOUR OWN PRIVATE SPACE

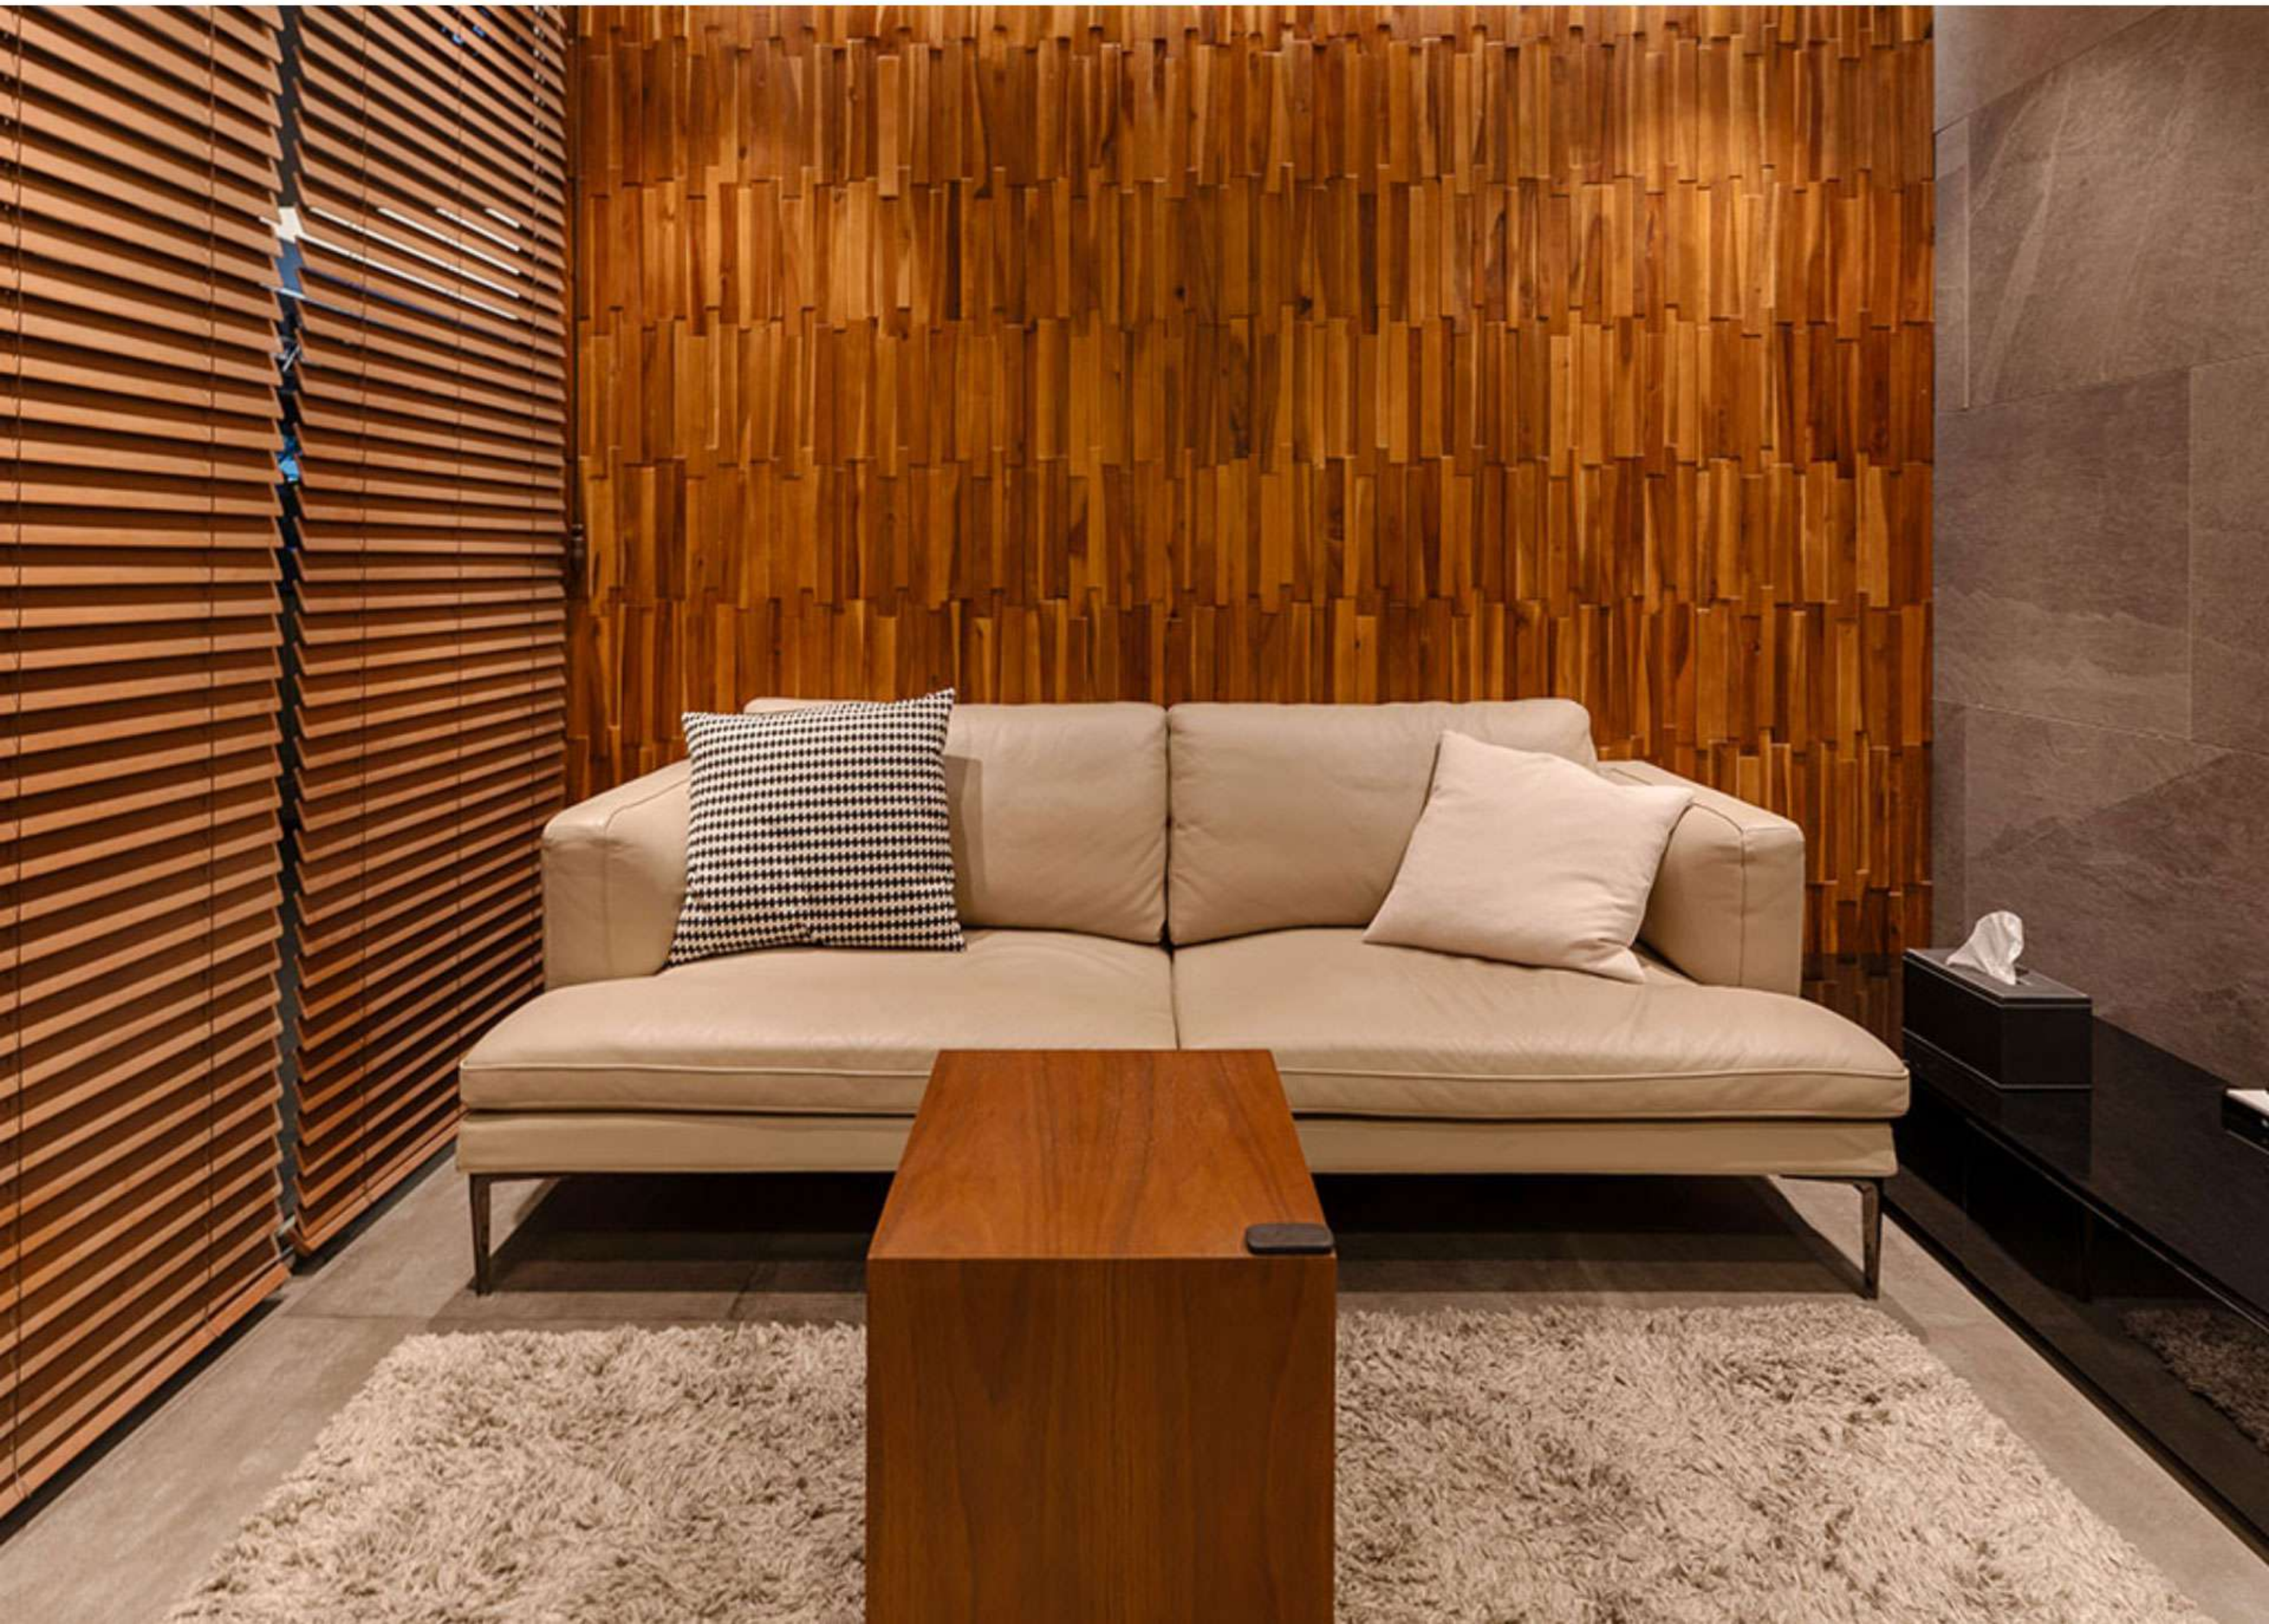

LASER / FILLER / SKIN BOOSTER / COLLAGEN BOOSTER / BOTOX

Page Lab Clinic is the ultimate beauty destination for anti-aging and non-surgical aesthetic treatments

With years of experience and advanced know-how, we offer exclusive, personalized care tailored to each individual. At Page Lab, every procedure is delivered with a touch of luxury—ensuring safe, detailed, and stunning results.

Enjoy your treatment in an atmosphere of complete privacy and comfort—because your beauty deserves nothing less than the best.

The first floor of Page Lab welcomes visitors with a spacious and comfortable waiting area. This room has seating and a cozy atmosphere.

The coffee bar is also located next to the waiting room, where guests can enjoy various types of coffee drinks made from quality coffee beans as well as other soft drinks.

A Private Treatment Space Redefining Comfort

The interior of the clinic is not just about aesthetics, it must also ensure that patients and the medical team truly feel comfortable. Page Lab revolutionizes the traditional clinic experience by prioritizing a luxurious, hotel-like atmosphere. We provide a private room for consultation and treatment, which combines comfort and care according to each patient's needs, ensuring that every moment of your treatment journey is memorable.

The second floor of Page Lab features waiting area for treatment preparation, makeup room, recovery room, and private treatment room.

- We operate a 24-hour air cleaning system to prevent pathogen infections and ensure a comfortable treatment environment (using Swiss IQAir)
- The space is designed using 100% natural aromas (provided by @aroma Japan)

Seoul National University Medical Graduate

With our extensive experience and surgical expertise, we provide customized one-on-one treatment tailored specifically for each customer. Our commitment to thorough and comprehensive medical care ensures that your safety remains our highest priority.

Precision Through Expertise: Page Lab's Collaborative Care System

At Page Lab, we go beyond the traditional single-practitioner approach. Our treatments are crafted through a seamless collaboration of specialized medical experts, each bringing their unique expertise to ensure the highest level of precision and care. By integrating the strengths of multiple specialists, we not only enhance client satisfaction but also tailor our treatments to meet a diverse range of aesthetic preferences—because beauty is never one-size-fits-all.

Precise Skin Analysis for the Perfect Fit Custom Treatment

The EveLab system captures high-quality 3D facial contours and high-resolution photographs of the skin in just 25 seconds.

It accurately assesses various skin concerns, including aging, redness, acne, and pigmentation.

Before our customers have a consultation, we analyze their skin using EveLab.

This precise analysis allows us to create customized skin treatments tailored to their needs.

Filler

Fillers serve as a type of “synthetic fat” that can restore volume to areas affected by loss or enhance naturally deficient areas.

Dermal fillers provide a non-invasive method for contouring and reshaping your face, allowing you to highlight your best features.

Choosing the right type of filler is essential. Page Lab Clinic offers a variety of fillers that you can select based on the area to be treated.

Ultherapy Prime

Ulthera is a non-invasive lifting procedure that uses High-Intensity Focused Ultrasound (HIFU) to deliver energy deep into the skin, promoting collagen regeneration.

This innovative treatment provides a lifting effect without damaging the skin's surface. By applying heat, Ulthera stimulates new collagen and elastin production, which helps tighten the skin.

Using ultrasound image-guided technology, it works from the inside out while preserving the skin's surface.

Results can be noticed within a few days, with further improvements typically continuing for up to three months.

Unlike invasive procedures, you can resume regular activities immediately after treatment.

Thermage FLX

Thermage FLX utilizes radiofrequency technology to heat the deep, collagen-rich layers of the skin while the treatment tip vibrates and cools the surface to enhance patient comfort.

This radiofrequency energy stimulates the skin to produce new collagen fibers, leading to gradual skin tightening.

During the Thermage procedure, a specialized treatment tip delivers controlled amounts of RF energy into the collagen layers of the skin. By targeting the deeper layers, Thermage FLX provides both immediate and long-lasting lifting effects.

It effectively addresses wrinkles, fine lines, uneven skin texture, and thinning lips.

The treatment can be applied to various areas, including the face, neck, around the eyes, and the body.

Botox

Botox offers a sophisticated solution for softening fine lines and wrinkles by temporarily relaxing targeted muscles.

At Page Lab, we emphasize a bespoke treatment plan, customizing the dosage based on each patient's facial anatomy and aesthetic preferences.

Our goal is to achieve a rejuvenated and elegant appearance that retains full facial expressiveness.

Common areas for Botox injections include the forehead, the outer corners of the eyes, and the space between the brows.

Rejuran

Rejuran is a skin rejuvenation treatment that uses polynucleotides (PN) derived from salmon DNA to repair and regenerate the skin.

It works beneath the surface, as Rejuran quickly stimulates collagen production and enhances skin moisture when injected into the skin.

This leads to improved skin elasticity, better skin texture, and a reduction in fine lines and wrinkles.

Radiesse

Radiesse is a premium collagen stimulator that enhances skin regeneration by boosting collagen, elastin, and blood vessel production.

Using CaHA technology, it naturally improves skin volume and texture while being safely absorbed by the body over 4–6 months.

Ideal for those seeking long-term skin quality improvement, not just temporary filling.

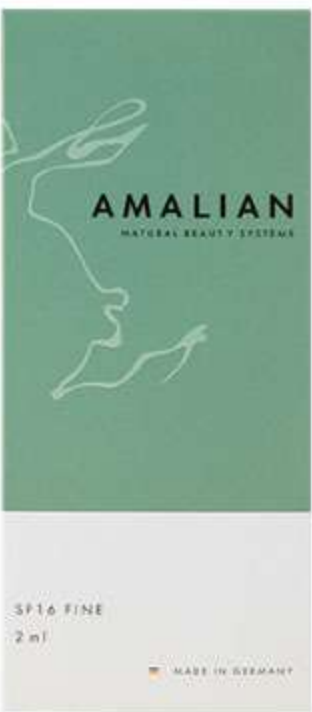

Juvederm *Volbella / Voluma*

A premium hyaluronic acid filler that restores volume, smooths wrinkles, and enhances facial contours with natural-looking results.

Restylane *Kysse / Defyne / Volyme / Vital / Eyelight*

Designed to hydrate, smooth, and add volume, Restylane® helps rejuvenate your appearance while maintaining a natural look.

Amalian *SF16 Fine / SF20 Medium*

German-engineered hyaluronic acid filler that provides deep hydration, volume restoration, and a naturally youthful expression.

Belotero *Soft / Balance / Intense / Volume*

A lightweight filler that integrates smoothly into the skin, reducing fine lines and enhancing facial contours with a soft, natural finish.

The Chaeum *N0.1 / N0.2 / N0.3*

A premium hyaluronic acid filler known for its soft texture, deep hydration, and natural, long-lasting volume restoration.

Neuramis *Deep / Lidocaine*

An advanced hyaluronic acid filler designed to reduce wrinkles, restore volume, and enhance facial features with a smooth, even finish.

Ellanse

A unique biostimulator that restores volume while encouraging natural collagen production for longer-lasting, youthful results.

Ulthera Prime

A non-invasive ultrasound therapy that stimulates collagen production to lift, tighten, and firm the skin. With no downtime, it delivers natural, long-lasting rejuvenation for a youthful appearance.

Thermage FLX

A non-invasive radiofrequency treatment that tightens skin, smooths wrinkles, and enhances facial and body contours by stimulating collagen production for long-lasting results.

Onda

A revolutionary body and face-contouring treatment using Coolwaves technology to reduce fat, tighten skin, and improve cellulite with minimal discomfort and downtime.

Sofwave

An advanced ultrasound technology that stimulates collagen production to lift and tighten the skin, reducing fine lines for a naturally youthful look.

Titanium

A cutting-edge radiofrequency treatment that tightens and tones the skin, improving texture and reducing wrinkles for a smoother, more youthful appearance.

Opus

A non-invasive fractional RF treatment that targets skin imperfections, stimulates collagen, and tightens skin, delivering smoother and firmer results with minimal downtime.

InMode

A versatile platform offering a range of treatments from skin tightening to body contouring, using advanced technologies for long-lasting, natural-looking results.

Linear Z

A focused ultrasound treatment designed to lift and tighten skin, reducing sagging and fine lines with no downtime.

Potenza

A dual-action treatment that combines microneedling with radiofrequency to stimulate collagen and smooth skin with minimal downtime.

Density

An advanced treatment that enhances skin texture and firmness by stimulating collagen, reducing wrinkles for a radiant look.

HydraFacial

A deep-cleansing and hydrating treatment that removes impurities and infuses the skin with nourishing serums for a radiant, refreshed glow.

Intense Ultra

Intense Ultra harnesses 10MHz ultrasound energy to stimulate deep skin layers, promoting collagen regeneration and improved circulation for firmer, healthier, and more luminous skin.

Coretox

Pure toxin that treats moderate to severe glabellar wrinkles in adults aged 20 to 65.

The Toxin

An FDA-approved botulinum toxin type A, meticulously formulated to soften fine lines with high purity and precision—revealing smooth, naturally beautiful skin.

Xeomin

This botulinum type A formulation minimizes allergy risks and is mainly used for minor to moderate forehead, eyebrow, and eye wrinkles.

Allergan

Reduces the visibility of moderate to severe wrinkles on the forehead, crow's feet, and between the eyebrows.

Rejuran

A skin rejuvenation treatment using PDRN (Polydeoxyribonucleotide) to repair and regenerate damaged skin, improving texture, elasticity, and overall skin quality for a youthful glow.

Rejuran HB+

Rejuran HB+ combines PDRN with hyaluronic acid to deeply hydrate and repair, enhancing skin's radiance, firmness, and texture for a smoother, revitalized appearance.

Rejuran I (EYE)

Rejuran Eye uses PDRN to nourish and repair the delicate skin around the eyes, reducing dark circles, fine lines, and puffiness for a refreshed, youthful appearance.

Rejuran Boost

A powerful booster that provides immediate skin repair and revitalization, enhancing overall radiance.

Skinvive

A revitalizing treatment designed to deeply hydrate and renew your skin for a naturally glowing complexion.

Juvelook

Enhance your skin’s radiance and texture with a treatment that promotes a youthful, refreshed appearance.

NCTF 135HA

An advanced injectable mesotherapy that delivers vitamins, amino acids, and hyaluronic acid to boost skin quality and radiance.

Vital Light

Restylane Vital Light with lidocaine provides deep hydration and enhanced comfort during treatment, improving skin elasticity and texture for a smooth, radiant complexion.

Neostem

A cutting-edge treatment utilizing stem cell derivatives to stimulate repair and rejuvenation, restoring your skin’s vitality.

Radiesse

This injectable filler provides immediate volume enhancement while stimulating natural collagen production, resulting in a subtle yet long-lasting rejuvenation of your facial contours.

Sculptra

Using poly-L-lactic acid, Sculptra gradually restores lost facial volume and improves skin texture over time, creating a naturally refreshed and youthful appearance with enduring results.

Juvelook Volume

Designed to restore facial fullness, Juvelook Volume smooths wrinkles and redefines contours, offering a refreshed look that enhances your natural beauty.

Ultracol

Targeting deeper layers, Ultracol provides advanced contouring and sculpting to refine facial symmetry and lift, delivering a more balanced and naturally contoured appearance.
